Mr. Dale Guariglia
Bryan, Cave McPhetters and McRoberts
500 North Broadway
St. Louis, Missouri 63102-2186

Dear Mr. Guariglia:

During our June 20, 1988, Cherokee County site PRP meeting, several of the PRPs suggested an alternative remedial action for the disposal of the mine wastes at the Galena subsite. Since that time, AMAX has conducted laboratory testing of that potential action. On December 9, 1988, AMAX will present to the Environmental Protection Agency (EPA) the technical findings of that work. You are invited to attend the meeting. To assist you in determining the appropriate representative(s), please bear in mind the meeting will be only for technical discussions on the PRPs' alternative remedial action and AMAX's work. The meeting will be at EPA's office in Kansas City, Kansas, at 1:00 p.m.

Sincerely yours,

Alice C. Fuerst
